

Bracelet Sizing

1. The printing

The Pavando wrist scale needs to be printed on an A4 letter size. Before printing anything, you need to go to the printing settings and check that the page scaling option is set to «Print entire image» and select «A4 borderless». Once you have printed the Pavando wrist scale, take a ruler and measure it to see if everything went well.

2. Using the Pavando wrist scale

First, take a pair of scissors and cut out the Pavando wrist scale. Be sure to make a slot at the bottom of the scale («CUT HERE»).

Then, put your Pavando wrist scale around our wrist and put the pointed end through the little slot. Be sure that it fits comfortably on your wrist, then look at the number you have on the scale. You can decide if you want a tighter or a looser fit. We recommend to not taking it too tight so that you can still move it on your wrist.

If you are not sure about the sizing, we advise you to visit the closest jewelry and ask for your wrist size.

Please note that this document was made to help you and that it is not an exact measure.
